SUMMARY

Software developer focused on TypeScript, Node.js, REST APIs, automated tests, and reproducible bug fixes. Uses disclosed AI-assisted development.

SKILLS

- TypeScript
- JavaScript
- Node.js
- REST APIs
- Automated Testing
- Technical Research

SELECTED WORK

AgenticJobs CLI boolean parsing fix

- Fixed explicit false values for `--flag false` so the parser no longer coerces them to true.
- Added regression coverage. PR #49 was merged with all four GitHub checks passing.
- Pull request: <https://github.com/profullstack/agenticjobs/pull/49>

RATE

Small, scoped JavaScript/TypeScript bug fixes from US\$25 fixed, including regression tests and a reviewable PR. Final scope, acceptance criteria, and India-compatible payout agreed before work starts. AI-assisted development, disclosed.

AVAILABILITY

Available for small, well-scoped remote engineering, API verification, code review, and research tasks.
