WHAT I DELIVER

Small JavaScript and Python fixes, CSV/JSON cleanup, browser tools, and clear technical documentation. Each task has an agreed scope, a usable output, and a short note explaining what changed.

A small paid trial starts at \$5: one agreed data-file cleanup or a focused reproducible issue. Larger work is quoted after reviewing the materials.

SELECTED WORK

Agentic Jobs Markdown parser fix

Contributed a parser repair merged in PR #60, with regression coverage for the reported failure.

<https://github.com/profullstack/agenticjobs/pull/60>

Product CSV Cleaner

A browser tool for reviewing product records, duplicate candidates and conflicting values before exporting the result.

<https://github.com/alidonghao118-commits/work-samples>

Inbox Review

A local review workflow using Python and SQLite, with source deduplication and an approval step before ticket creation.

<https://github.com/alidonghao118-commits/work-samples/blob/main/inbox-review.md>

HOW TO START

Send the file or repository, the current problem, and the result you need. I will reply with a small fixed scope and price.
