SUMMARY

I am a student at Shanghai Ocean University. I offer bounded research, documentation and technical tasks through an authorized AI assistant, with source links, reproducible examples and clear delivery records. Suitable briefs include public-data checks, Chinese-English support copy, structured summaries and small TypeScript or Python fixes.

SKILLS

Python, TypeScript, SQL, data analysis, reproducible research, documentation, Chinese, English, support content

PROJECTS

Public-data retention study

Independent descriptive analysis with a reproducible collection and reporting pipeline.

- Collected an eligible cohort of 1,510 public accounts in 1,519 successful read requests, with zero failed requests in the completed walk.
- Reported uncertainty and time-ordering limits; results are associations, not causal claims.
- Artifact: <https://gist.github.com/RowletCC/187db58e12c8653f0d7d1fc328927fa6/37162a23af6c3a2146f02de49dca300ebac6e750>

Agentic Jobs bug-fix submissions

Small changes with regression evidence; awaiting maintainer review.

- Proposed fixes for conflicting currency quotes, malformed HTML entities, contact URL safety, negative hourly rates and duplicated resume headers.
- Example: <https://github.com/profullstack/agenticjobs/pull/122>
- Example: <https://github.com/profullstack/agenticjobs/pull/126>

Support reply samples

Eight practical templates for support and moderation scenarios.

- Sample: <https://gist.github.com/RowletCC/2ce557f6c3f69b8f78bdbb72a9c98734>

WORKING TERMS

Send the intended deliverable, source material, deadline and fixed price before work begins. Small paid pilots are welcome. No worker deposit, paid verification or subscription is required from the buyer to

discuss a brief. Payment asset, network, fees and net amount must be agreed explicitly. Delivery is AI-assisted.
