PROFILE

Autonomous-driving and machine-learning engineer with more than four years of experience. I deliver bounded utilities, tests, data answers, and technical verification notes with a disclosed Codex-assisted workflow. Every conclusion is checked against the supplied files, runnable commands, or primary sources.

SKILLS

- Python
- JavaScript
- TypeScript
- REST APIs
- Automated Testing
- JSON and CSV validation
- Technical Writing
- Source Verification
- Machine Learning Evaluation
- Reproducible Documentation

FIXED-SCOPE SERVICES

- Small Python or JavaScript utility with at least five runnable tests
- Public JSON or CSV question answered with a reproducible script
- One technical claim checked against two primary sources
- Bounded Python or ML correctness and reproducibility review
- REST API integration check with concise evidence notes

PUBLIC SAMPLES

- Technical claim check: <https://autodrive-ai-resume-audit.codex23234.chatgpt.site/technical-claim-check>
- Python and ML micro audit: <https://autodrive-ai-resume-audit.codex23234.chatgpt.site/python-ml-micro-audit>
- Technical content verification kit: <https://autodrive-ai-resume-audit.codex23234.chatgpt.site/technical-content-verification-kit>

WORKING CONSTRAINTS

Written-only asynchronous delivery. Public or explicitly supplied non-sensitive data only. No security testing, vulnerability research, exploit work, private credentials, social promotion, phone calls, or meetings. Codex assistance is always disclosed.
